Profile

I am Momoh Abdul Jabbar, a dedicated professional often referred to as a "coding machine" due to my unwavering commitment to coding for approximately eleven hours daily. My extensive skill set encompasses full stack development, digital marketing, and a profound enthusiasm for Web 3 technologies.

I am poised to leverage my qualities and skills to not only advance the interests of any organization or entity but also to make significant contributions to the strategic growth and development of the establishment. My unwavering commitment to excellence and my eagerness to continuously learn and enhance my abilities will ensure that the organization's objectives are not only met but surpassed.

Professional Experience

02/2022 – 07/2023 Remote	**FRONTEND DEVELOPER,** *woof Solana* • Worked on the company's web features. • Tested and refined software with the team leads prior to rollout. • Collaborated with frontend engineers and UI/UX designers to create easily accessible web experiences • Got exposed to web 3 development
01/2019 – 10/2021 ABUJA, NIGERIA	**FULL STACK DEVELOPER/SOCIAL MEDIA MARKETER THRIVE DIGITAL** • Orchestrated collaborative efforts within a cross-functional team to develop both front-end and back-end components of the company's website.

- Leveraged cutting-edge technologies, including React.js and Next.js, for the front-end, while implementing the Sanity content management system to handle the back-end.
- Employed GraphQL as the primary query language, significantly enhancing data retrieval and manipulation capabilities.
- Assumed a multifaceted role within the organization, spearheading content marketing endeavors.
- Strategically utilized mobile devices and small electronic gadgets to drive business growth.
- Devised comprehensive strategies and plans to ensure the company's success.
- Oversaw and executed email marketing initiatives across the organization.

04/2018 – 12/2018
remote

I.T PERSONAL/WEB DEVELOPER ,MANAGEMENT AND INFORMATION SYSTEM UNIT(MIS), *Mr kester O Omoregie*

- Meticulous record keeping and management of school MIS records.
- Thorough examination of data processing and in-depth data analysis.
- Significant involvement in the development of the school's e-portal.

Projects

2023

My Portfolio Website ⌉

My portfolio is a testament to my commitment to excellence and my proficiency in utilizing cutting-edge technologies. Crafted with precision and innovation, it features the latest technologies such as Next.js 13's app router, sleek animations powered by Framer Motion, and is developed with TypeScript and Tailwind CSS. Beyond its technical sophistication, my portfolio conveys a narrative about my identity as a full-stack developer, complemented by a motivational message from Mark Zuckerberg that fuels my passion.

The imagery of the planet in my portfolio serves as a symbolic representation of my coding prowess and ambition. It is intended to emphasize the distinction between my skills and those of an extraterrestrial being, underscoring the extraordinary nature of my capabilities.

2023

WOOF SOLANA OFFICIAL WEBSITE ⌉

As a Frontend Developer at Woof Solana, I played a pivotal role in the creation and enhancement of our website. Here's a detailed breakdown of my responsibilities and contributions:

1. I was an integral part of the team responsible for designing, developing, and maintaining the company's website. Leveraging my expertise in front-end technologies, I contributed to the creation of a user-friendly, responsive, and visually appealing website.

2. I utilized a range of modern technologies to build the website, including Next.js for efficient server-side rendering, React for dynamic user interfaces, and Tailwind CSS for rapid and maintainable styling. Additionally, I integrated GSAP (GreenSock Animation Platform) to implement captivating animations and transitions, enhancing the overall user experience.

3. I ensured that the website was responsive across various devices and screen sizes, allowing users to seamlessly access our services on desktops, tablets, and mobile devices.

4. I collaborated with the UX/UI design team to translate their design concepts into functional and interactive web elements. This involved careful consideration of user flow, accessibility, and overall design coherence.

5. I implemented performance optimization techniques to enhance page loading speed and overall site performance. This involved code splitting, lazy loading to reduce load times.

6. I rigorously tested and fine-tuned the website to ensure it functioned flawlessly on various web browsers, ensuring a consistent user experience regardless of the browser being used.

I actively collaborated with cross-functional teams, including back-end developers, designers, and project managers, to ensure the seamless integration of front-end and back-end components. Effective teamwork was crucial to the success of the project

In summary, my role as a Frontend Developer at Woof Solana was pivotal in delivering a visually engaging, highly functional, and responsive website. My use of Next.js, React, Tailwind CSS, and GSAP, in conjunction with teamwork and a focus on performance, played a crucial part in shaping our web presence and enhancing the user experience.

FOCUS BANK, *A bank for everyone* ⬈
Focus Bank is a ready-to-use banking User Interface (UI) developed by me with a sleek and visually stunning design, coupled with an emphasis on user-friendliness and clean loading skeletons. It is built using modern web technologies such as Tailwind CSS, React, and Next.js, ensuring a smooth and responsive user experience. The UI also incorporates HTML for its structure.

The UI boasts exceptional design, setting new standards for aesthetics and functionality within the banking sector. It combines the power of React and Next.js for dynamic and interactive user interfaces.

It is designed to provide a user-friendly experience, ensuring intuitive navigation for customers, and it leverages the simplicity and flexibility of Tailwind CSS for styling.

The implementation of clean loading skeletons ensures a seamless and distraction-free loading experience for users. The use of React and Next.js contributes to the efficiency and speed of the application.

Focus Bank's responsive design adapts effortlessly to various devices and screen sizes, ensuring a consistent user experience.

2022   Store Genius ⬈

Store genius is the ultimate API generator for customizing and managing your online store. Create, update, and delete products and billboards with ease . Enjoy dark and light modes for a sleek user experience. Tailor-made for any store, from books to fashion. The skills used include Clerk Authentication Next Js Tailwind CSS React html planet scale Prisma Radix Ui Next Api Stripe. you can visit the live website at https://storegenius.vercel.app/ ⬈

01/2023   MEDIUM CLONE WEBSITE, *Medium app building challenge* ⬈

"Medium" is a platform I hold in high regard, and my admiration for it inspired me to embark on a journey of web development. The resulting web application, built with cutting-edge technologies such as Firebase, Tailwind CSS, and HTML, not only offers robust functionality but also mirrors the user interface of the original Medium app, providing a seamless and familiar user experience.

The inception of this web application was the result of a friendly challenge issued by an acquaintance who doubted my ability to recreate the visual aesthetics of the Medium app. This challenge became a catalyst for my creative and technical prowess, ultimately leading to the development of this remarkable web experience.

2021   JABBAR'S BLOG, *favourite blog for everything information* ⬈

Creating my personal blog has been an immensely enjoyable experience. As someone who values staying informed about the most significant developments, I felt compelled to share this knowledge with others through a blog.

This blog serves as my official platform for disseminating a wide array of information. It covers a diverse spectrum, including technology, politics, religion, and lifestyle. I meticulously developed and designed this blog using Next.js, Tailwind CSS, and Sanity. It is seamlessly hosted on Vercel, ensuring optimal performance and accessibility.

11/2022   PIZZA ORDERING APP ⬈

I have an absolute affection for pizza – who can resist its deliciousness? During my exploration of Framer Motion and React.js, I found myself contemplating the idea of crafting an application dedicated to all things pizza.

This unique pizza-themed application is the result of my expertise in HTML, CSS, and Framer Motion. To ensure its accessibility and performance, I chose to deploy it on Netlify, providing users with a smooth and engaging experience.

2022	**SATISFACTION EATERY** ⬈
	My foray into the world of Tailwind CSS marked an exciting venture. The objective was to create a straightforward, responsive webpage using minimal resources. This endeavor resulted in a webpage constructed exclusively with Tailwind CSS, HTML, and SVG images.
